Increase your level of immersion for a full gaming experience!

To complete the gamer's setup, the quality of the **monitor** is crucial for a perfect and immediate transcription of the information received from the PC and all the devices.

For gamers, it's no longer just a matter of playing, but also experiencing the game: **the monitor must respond to the need for a full immersive experience.** Our experts have considered all the attributes of monitors, including size, screen definition, type of panel, refresh rate and connections to provide you with the best gaming experience according to your ambitions.

MD27 PRO 165 GAMING MONITOR

The Millenium MD27 PRO 165 monitor has been designed to **meet the expectations of demanding players** in search of a high performance/quality/price ratio along with advanced and extensive features! The **sleek and elegant design** enables perfect integration within your setup.

The monitor is compatible with the **latest technology** to enjoy your favorite games. Comfort of use is not compromised, as **many adjustments are available** on the adjustable foot to **maintain an ergonomic posture** during long playing sessions!

STRENGTHS

For ultimate comfort of use, our monitor is equipped with a **curved 27" VA panel** offering an excellent **Quad HD definition (1440p)**: thanks to this panel, the number of pixels per inch is significantly increased compared to more traditional 1080p monitors and **the image becomes sharper!** Its **ultra-low response time of 1 millisecond (MPRT)** avoids any undesirable "ghosting" effect.

Of course, the refresh rate has not been neglected, as it can reach **up to 165Hz!** Thanks to the high frame rate, the monitor is capable of displaying a large number of images per second: the resulting **gain in latency** along with the peripherals allows for perfect in-game fluidity that will provide you with victory!

With the support of **FreeSync / G-Sync Compatible**, say goodbye to image tearing or image jumps: the MD27 PRO 165 monitor remains in sync with the graphics card at all times!

VISUALS

BEHIND THE SCENES

When deciding which model should be added to our range, the clear choice was a 27-inch screen with excellent 1440p resolution and a modern VA panel: a screen with the famous screen curvature that was not available on our previous MD27 PRO.

Special attention was placed on the colorimetry of this model, in order to obtain accurate images. Contrast ratio of 4000:1 is excellent compared to TN panels and vision angles are significantly improved to avoid image darkening when you are not in front of the monitor.

SPECIFICATIONS

Screen size	27 inches / 68,58 cm
Resolution	2560 x 1440p
Aspect Ratio	16:9
Panel	VA (curved) - 85% NTSC
Non-glare	Yes
Curvature Radius	1500R
Pixel Pitch	0,2331 mm x 0,2331 mm
Refresh rate	165 Hz (Max) - FreeSync Range: 48~165Hz
Response Time	1 ms (MPRT) / 4 ms (GtG)
Brightness	300cd/m² (Typical)
Contrast	4000:1
Viewing angle	178° Horizontal / 178° Vertical
Supported technologies	VESA Adaptive-Sync : AMD Freesync or Nvidia G-Sync Compatible (using DisplayPort only) HDR
Video connectivity	Display Port 1.2 (x2) - HDMI 2.0 (x1)
Audio connectivity	3,5mm headphone jack output
Ergonomics	Height Adjustable Tilt : -5° à 15° Landscape / portrait rotation
VESA compatibility	100 x 100 mm
PIP Support	Yes
Dimensions with stand	605,5 × 459,4 × 251,8 mm (L x H x D)
Dimension without stand	605,5 × 362,3 × 88,0 mm (L x H x D)
Packing size	840 x 540 x 210mm (L x H x D)
Power consumption	≤54 W / Standby : ≤0,5 W
Included accessories	Power Cable - DisplayPort cable User's manual
Net Weight	3,3 kg
Gross Weight	6,9 kg
EAN	3527570077838
