A seamless audio experience, everywhere, all the time

Our In-Ear headphones MH1 meet a very specific need: mobility. The most demanding gamers need equipment capable of adapting to all their needs. The MH1s follow the players wherever they go, whatever the media support used. Whether traveling on public transportation with a smartphone or with a PC connected to a LAN, the MH1s stand out as the ultimate solution for mobile gamers

Advantages of our In-Ear MH1

Versatile and powerful, our MH1s are designed to meet the needs of mobile gamers who are looking for a product that fits almost all of their devices.

The MH1's 3.5mm jack cable makes it easy to connect to mobile devices such as smartphones, tablets and laptops.

Delivered with a "Y" splitter cable, the MH1s will easily fit on all desktop PCs, as well as PCs dedicated to gaming.

Comfort is an extremely important factor to consider. That's why we have engineered our MH1s to be as comfortable as possible, with 125g and a compact design, they will be quickly forgotten once inside your ears.

The bundle comes with several sizes of silicone ear tips so that the MH1s can be adapted to suit everyone's ears with perfect fitting.

For optimal user comfort, the MH1's cable is equipped with a remote control and a microphone. The microphone is designed to ensure clear and intelligible voice communication.

We placed special attention to the audio quality of our MH1s. With a clear and deep rendering, the MH1s are meant to be versatile, as enjoyable to use for gaming as they are for other multimedia uses, such as listening to music or watching a movie.
